

Instructions

Creating a cryptocurrency wallet

1. Download and install a cryptocurrency wallet on their smartphone device. App suggestion: Trust Wallet (icon looks like a blue shield)
2. Once installed, open the app and follow the instructions to "Create new wallet"
3. Tap "back up manually"
4. Tap all 3 checkboxes/agreement points then 'continue'
5. Get a physical paper and pen, write those 12 words (in order / numbered) shown on screen (make sure no one is watching, there's no cameras, and don't speak those words), then hit 'continue'
6. Confirm to the app that you've properly written those words by answering their questions, then hit 'confirm'
7. Create a passcode/password for the app
8. Tap 'start using Trust Wallet'

How to add PGS313 token into your wallet

1. In the home page of the Trust Wallet app, scroll down and tap on the 'Manage crypto' text/button
2. If 'BNB' ('BNB Smart Chain') is not enabled, search for it and enable it.
3. Search for 'USDT', which will show you multiple versions of USDT tokens to enable. You only need to enable a specific one: USDT BNB Smart Chain (make sure it's exactly that).
4. Now click the '+' icon at the top right of the current page you're on
5. Change the network from 'Ethereum' to 'BNB' ('BNB Smart Chain')
6. Copy and paste the following line of text and paste it in the 'Address' field:
`0x0771E90521497290D2e30fCae73BE0c299C80f92`
7. Once pasted, the rest of the fields should be automatically filled up. Tap 'Import'. PGS313 should be on your list now and enabled.
8. Go back to your Trust Wallet's home page.
9. You will now need to add BNB tokens to handle transaction fees (\$10 worth of it should be enough). You will also need to add USDT as well (the amount you'll be sending to obtain PGS313. Example: \$100)
10. In both of these cases, you tap on either one of the tokens, tap 'receive' and that's the address you need to provide someone to obtain BNB and/or USDT (both of them are on the 'BNB Smart Chain' / are 'BEP20 Tokens'. Make sure the send/funder knows this).
11. Once you have obtained USDT and BNB, you're now ready to purchase PGS313 tokens.

Instructions

How to purchase PGS313

1. Get a PC (Laptop/Desktop) and open the following link:
<https://pancakeswap.finance/swap?inputCurrency=0x55d398326f99059fF775485246999027B3197955&outputCurrency=0x0771E90521497290D2e30fCae73BE0c299C80f92>
2. Click on the "Connect Wallet" button.
3. Click on the 'WalletConnect' icon. Another pop-up will appear with a QR code.
4. Open your phone, then open Trust Wallet, then on the homepage of the app, tap the gear icon on the top left of the app/screen
5. Tap the 'WalletConnect' in the middle of the screen, then 'Add new connection'
6. (Allow camera access if it requests it)
7. Your camera should be active now, so scan the QR on your PC.
8. Allow, then Connect
9. Go back to your home page in Trust Wallet
10. Now on your PC, the top field should be 'USDT' and the below one should be 'PGS313'. Insert the desired amount of USDT at the top and you'll see the amount of PGS313 you'll receive.
11. Click 'Swap' then 'Confirm'
12. On your Trust Wallet app on your phone, tap 'Approve' once it appears, then add your passlock/password, then 'Approve' again once it appears again, then add your passlock/password again.
13. Wait a few seconds to a minute, and your USDT should have been sent, and you should have also received PGS313 tokens in your Trust Wallet app.
